

The Homework Hustle

Problem: The student has a big homework assignment due tomorrow and also wants to play video games with a friend.

Challenge: Show how the student's time management choices lead to either success or stress.

Don't forget to include:

- A character (or characters) demonstrating either good or poor time management
- Show the consequences of their choices.
- Include at least one specific time management strategy
- Show how time management impacts feelings and mental health

The Weekend Whirlwind

Problem: It's Saturday, and the student has chores, a family outing, and wants time for their favorite hobby.

Challenge: Show how the student juggles (or fails to juggle) these different demands on their time.

Don't forget to include:

- A character (or characters) demonstrating either good or poor time management
- Show the consequences of their choices.
- Include at least one specific time management strategy
- Show how time management impacts feelings and mental health

The Project Panic

Problem: A long-term project is due soon, and the student hasn't started (or has started but is easily distracted).

Challenge: Show the consequences of procrastination or good planning.

Don't forget to include:

- A character (or characters) demonstrating either good or poor time management
- Show the consequences of their choices.
- Include at least one specific time management strategy
- Show how time management impacts feelings and mental health

The "Just Five More Minutes" Trap

Problem: The student keeps saying "just five more minutes" for a fun activity, delaying important tasks like getting ready for bed or finishing a chore.

Challenge: Show the snowball effect of small delays.

Don't forget to include:

- A character (or characters) demonstrating either good or poor time management
- Show the consequences of their choices.
- Include at least one specific time management strategy
- Show how time management impacts feelings and mental health
